

The department of mathematics of Université Paris 13 offers two one year fellowships for graduate students willing to prepare a Master 2 in Pure or Applied mathematics. We propose every year high level courses in the main research themes represented in the department, namely Arithmetic and algebraic geometry, Algebraic topology, Ergodic theory and dynamical systems, Mathematics for information and image processing, Modeling and Analysis, Mathematical Physics and PDEs, Probability theory and Statistics.

Candidates are supposed to be outstanding students in mathematics who have completed the first four years of university. The department offers a financial support of 10300 euros for the ten months of the academic year, and refunds moreover a round trip ticket to Paris.

Applications should include a letter of motivation of the candidate, a copy of the last diploma, a copy of the marks obtained during the current year and the preceding one and a letter of recommendation written by a professor of the university of the candidate. These documents should be sent exclusively by e-mail to Philippe Fleurance : fleurance@math.univ-paris13.fr
