

Presentation of the École Parisienne
d'Arithmétique et de Géométrie (ÉPAG)

October 26, 2021

Goals

- Gather PHD students who share the same mathematical interests (in a broad sense), in an unique structure.
- Create a platform where one can find information about conferences/seminars/lecture groups happening in Paris and nearby.
- Organise events (e.g. "Journée de rentrée") so members can meet up.
- Facilitate new PHD students' integration and provide information about postdocs.

What to do?

- There exists a similar structure in London : the LSGNT.
- <https://www.lsgnt-cdt.ac.uk/>
- There is a mailing list : https://listes.math.cnrs.fr/www/subscribe/epag?previous_action=info
- You can fill the form to provide all the useful information about you : <https://formfacade.com/public/100907096504958585506/all/form/1FAIpQLSepS1F41TA4VX8jz4pre0vp2XMgGIYEa8D-s5hE6VNMXhK9f>

What's next?

- The website is online :
`https://www.math.univ-paris13.fr/~epga/index.html`.
Beware that the url might change and that the website should evolve soon.
- Anyone will be able to update the list of events.
- We may need some help to finalise the website: e.g. put the list of members "non-manually" (any help appreciated).
