

Diagrammatic equation defining  $PT_n$ :

The left side shows a vertex connected to  $n$  external lines labeled  $1, 2, \dots, n$ .

The right side shows a sum over all planar tree diagrams  $PT_n$  with  $n$  external lines, each weighted by a sign  $\pm$ .

The diagrams on the right are examples of planar trees with  $n$  external lines labeled  $i$  and internal lines labeled  $h$  and  $p$ .
